1.0 Mental Health Indicators

MH 1.04 Average Weight per Case by Age Category

This table and chart present the ARIW for all inpatient DAD mental health cases by age category. The average inpatient weight per case represents the inpatient Resource Intensity Weight (RIW) which is reflective of the amount of resources required by the hospitals to care for patients based on the CMG during their hospital stay. A zero volume is shown as blank.

- 0 - 7 years
- 8 - 12 years
- 13 - 17 years

2.0 Mental Health ED Indicators

2.03 - ED Mental Health Visits by Top Main Problems

This table displays the Top 10 main problems/most responsible diagnosis by Academic Health Sciences Centers and Community Hospitals for mental health ED visits.

AHSC			
Main Problem ICD10	Description	# of ED Visits	% of ED Visits
F430	Acute stress reaction	859	15%
F419	Anxiety disorder unspecified	720	13%
R458	Other symptoms and signs involving emotional state	720	13%
F329	Depressive episode unspecified	654	12%
R4688	Other symptoms and signs involving appearance and behaviour	380	7%
F100	Mental and behavioural disorders due to use of alcohol, acute intoxication	328	6%
F410	Panic disorder [episodic paroxysmal anxiety]	160	3%
F919	Conduct disorder unspecified	155	3%
F432	Adjustment disorders	139	2%
F959	Tic disorder unspecified	108	2%

Community Hospital			
Main Problem ICD10	Description	# of ED Visits	% of ED Visits
F329	Depressive episode unspecified	2,046	14%
F430	Acute stress reaction	1,921	13%
F419	Anxiety disorder unspecified	1,908	13%
R458	Other symptoms and signs involving emotional state	1,710	12%
F432	Adjustment disorders	1,162	8%
F100	Mental and behavioural disorders due to use of alcohol, acute intoxication	942	7%
R4688	Other symptoms and signs involving appearance and behaviour	396	3%
F410	Panic disorder [episodic paroxysmal anxiety]	326	2%
F919	Conduct disorder unspecified	283	2%
F900	Disturbance of activity and attention	190	1%

2.0 Emergency Department Mental Health

2.04 - MH ED Revisits by Site

The table and chart below the number of Emergency Department mental health revisits by hospital. A revisit is defined as a patient who revisited the ED any of the Benchmarking Report participating facility within 30 days of their last visit from any of the Benchmarking Report participating facilities.
